

## Be An Electrician: The Tough Job Of Making Other's Life Easy

Electricity and electric appliances are so deep rooted into our life style that it's difficult to now imagine our life without them. Right from the time we wake up in the morning till the time we go to sleep at night, we all make use of electric appliances. Even while sleeping we make use of electric appliances like air conditioner, fan, etc. We use electricity for almost 24 hours.

It is interesting and challenging to be an electrician. All those people who like tackling challenges will like to be an electrician. To be an electrician is to be a specialized professional in creating, working, repairing, and designing electrical appliances. Electricians also install and maintain fuses, wires, and other electric connection in factories and malls. People are day-by-day getting more and more used to electric appliances. In such cases, to be an electrician, gives you a great opportunity to earn and have a bright career. The more people are dependant on electrical appliances, the more is the demand for an electrician. To be an electrician is a big responsibility as this job is delicate and at the same time involves high risk.

Safety is more than just a word for electricians. Being an electrician, one has to take all the safety precautions while doing the job. Sometimes even a small mistake can cost their life. To be an electrician it is important to wear clothes suitable for the profession. Generally tight cloths are good on the job as loose clothes may come in contact with the wires while working. They should also avoid wearing metal ornaments. Being an electrician, one should know that metals are good conductors of electricity. Shoes made of rubber are best to use while on the job. It's really hard to be an electrician and these are just few precautions that can make this job safe and enjoyable.

There are fields of specialization, in this profession like outdoor electrician and indoor electrician. To be an electrician specializing in outdoor works involves work like looking after installation, maintenance, repair of electric wires, and ensuring that there is proper electric supply to the target place. To be an electrician specialized in indoor works involves work of bringing electric supply to all electric appliances inside a house, commercial complex, mall, factory etc. Success of an electrician in a chosen specialized field depends upon some personal factors like one has to be disciplined, attentive, dedicated, and must have a sharp mind on the job. An electrician must have a good and healthy body. A good vision is necessary to differentiate between different colors of wires. Having good mathematical skills is also important to be a good electrician.

To be an electrician, one has to have intensive training and practical experience before getting on the job. There are many academic courses for electricians involving classroom training, along with practical training. Some join the apprenticeship program which gives on the job training and some start learning there under the guidance of a trained senior supervisor.

To be an electrician is to be a "Tech" man. To be an electrician, is just electrifyingly rocking!
