

Rain Gear – the Right Type Makes All the Difference

Rain Gear – the Right Type Makes All the Difference

Rain gear will keep you warm and dry not only when bicycling, but also when hiking, power walking, boating, motorcycling, golfing, walking the family dog, star gazing, etc. Rain gear is the way you stay dry when doing anything out in the elements.

Whether it's breathable waterproof, or non-breathable waterproof rain gear it's the comfortable fitting, stylish protection you want when working or playing in the great outdoors. When maximum warmth and dryness are the goal, non-breathable rain gear is the top choice. It holds in all body heat, while keeping outside moisture from penetrating. On the other hand, when you find yourself in need of rain protection during times of strenuous activity such as jogging or vigorous cycling, breathable rain gear is a great choice. Breathable rain gear has moisture transfer qualities. It allows the fabric to move accumulating body moisture from the inside of the fabric to the outside. You stay dry inside and out.

When the unexpected rain shower suddenly appears, you want a quality, lightweight, smart fitting and easy-to-get-to piece of rain gear in your day pack, saddle bag, fanny pack or backpack. Rain gear that doesn't take up precious space is the sports person's best friend. At the first hint of rain, you can have immediate protection, keeping your clothing dry as the downpour continues. Your rain gear pants, jacket and helmet cover will shed the rain, keeping you dry, warm and comfortable underneath. It's like having an instant tent!

Without proper rain gear protection, you may arrive at your destination soaking wet. It's easy to understand how uncomfortable and inconvenient this would be. With proper rain gear protection you will save yourself time, and avoid the frustration and discomfort of wet clothes. Imagine how uncomfortable it would be to find yourself in the middle of a bike ride, a golf game, a leisurely walk or hike when an unexpected rain shower begins. You suddenly realize that you are without quality rain gear protection. You would find yourself at the mercy of the elements, and soon would be wearing clothing that was soaking wet. Ugh!

You might find yourself on the fourth green preparing for that important putt for par when the rains suddenly begin. You reach into your golf bag and pull out your lightweight rain gear and within moments you are warm and dry. You comfortably line up your putt and sink it. A little rain isn't going to stop you from enjoying yourself.

With proper rain gear, you can easily and instantly slip into waterproof clothing. Rain gear such as waterproof pants and jackets will help you continue on your way, confident in knowing that the rest of your trek, ride, game, walk, or camping experience will not be ruined by continuing showers or intermittent downpours.

In addition, the best rain gear offers the added advantage of making your ride, walk, or trip a safer one with its reflective patches that warn auto traffic of your presence at night and in low visibility situations.

The best rain gear offers the great advantage of being both lightweight and compact. It takes up very little space in your backpack, saddle bag, golf bag, day pack or purse. Because it is completely waterproof, shedding all water, it dries out quickly. When the sun breaks through, these quality rain gear products are easily stashed away. Good rain gear will surely be one of your favorite traveling companions.

The best rain gear is a fashionable, practical way to insure that your outdoor activities continue to bring you pleasure even amidst the ever changing moods of Mother Nature. Don't leave home without your rain gear, and you will be prepared for the great outdoors and all the wonders and joys it can provide!
